should it be held here in 1957 (late May or early June).

Our Chapter Chairman, Mrs. Goodman, who is a member of the faculty of Boone High School in Orlando, is personally promoting a project within her school with a view of arousing the interest of a group of young people in the hibiscus as a typical Florida ornamental shrub, offering untold varieties of beautiful bloom. She has secured the cooperation of one of the agriculture teachers who now has a number of growing cuttings and he is also working with his group on the various methods of propagation. Mrs. Goodman has been happy to provide the cuttings, graft wood and a few seed pods for the furtherance of this project.

The above committees are acting locally in cooperation with the American Hibiscus Nomenclature and Registration Committee of which Mr. Norman A. Reasoner, Bradenton, Florida is Chairman.

Any individual having a seedling or hybrid which he desires to register or to list in the new nomenclature supplement, should contact the committee in his locality. The local committee will inspect the plant and bloom and will make recommendations to the National Nomenclature and Registration Committee for final action.

Mr. Norman A. Reasoner has appointed a Supplement Color Key Committee to work on the new supplement: Mr. & Mrs. B. L. Barling, Mrs. Paul Goodman and Mrs. K. M. Denman of Orlando, Florida.
